

SUPPLEMENTARY MATERIALS

Appendix Tables

- A. Descriptive statistics.
- B. Tables assessing the matching process including correlations and balance checks.
- C. Estimating results using the same sample, same method, and same covariates.
- D. Robustness checks for EOC scores outcome.
- E. Robustness checks for graduating/dropout outcomes.

A. Descriptive statistics.

Table A1

Percent of sample by whether their EOC test is associated with a F2F repeated course, CR, or both.

	(1) Math I	(2) English II	(3) Biology
<i>F2F Only</i>			
1	47.69	42.46	43.31
2	7.44	4.98	4.23
3-4	0.72	0.40	0.18
<i>CR Only</i>			
1	7.39	8.76	9.07
2-3	0.21	0.29	0.31
<i>CR/F2F (Same Year)</i>			
1	2.82	2.15	2.05
2	0.06	0.04	0.02
<i>CR & F2F - Separate Years</i>			
1 CR, 1 F2F	2.12	2.24	1.57
2 CR, 1 F2F	0.05	0.03	0.02
1 CR, 2-3 F2F	0.14	0.12	0.05
<i>CR & CR/F2F</i>			
1-2 CR, 1-2 F2F	0.19	0.13	0.09
<i>F2F & CR/F2F</i>			
1-3 F2F, 1-2 CR/F2F	1.02	0.80	0.42
Initial EOC score	30.11	37.58	38.68
Observations	83321	57504	55461

Table A2***Descriptive statistics on the sample of students for the EOC analysis.***

	CR		F2F		CR & F2F		Initial Score

Note. Standardized differences and standard deviation (SD) ratios are between the CR mean/SD and the other treatment statuses mean/SD; Post matching estimates are weighted using the propensity score; Differences outside of the acceptable range of values are bolded (greater than 0.25 for standardized differences and outside of the 0.5 to 2 range for SD ratios); Means will be lower in this table than overall descriptive for variables that we transformed to zero when data were missing.

Table B3*Balance check on covariates not used in the matching process.*

Note. Standard errors in parentheses; Standard errors clustered at the school level; Models weighted with propensity scores created through a marginal mean weighting through stratification procedure; Covariates omitted for brevity; The difference in sample size between this model and the linear probability models is caused by the logistic regression procedure dropping units where there was no variation on the outcome within school-cohort (i.e., all students within student cohort graduated or did not drop out).

Note. Standardized differences and standard deviation (SD) ratios are between the CR mean/SD and the other treatment statuses mean/SD; Post matching estimates are weighted using the propensity score; Differences outside of the acceptable range of values are bolded (greater than 0.25 for standardized differences and outside of the 0.5 to 2 range for SD ratios); Means will be lower in this table than overall descriptive for variables that we transformed to zero when data were missing.

Missing Overage		-0.13*** (0.01)	0.08*** (0.01)
Missing Discipline Data		-0.05*** (0.01)	0.03*** (0.01)
Constant	0.43** (0.15)	-0.41*** (0.10)	1.07*** (0.06)
Observations	14403	14403	59914

Note. Standard errors in parentheses; Standard errors clustered at the school level; Models are not weighted by inverse probability weights or propensity scores instead the sample is restricted to students who matched through coarsened exact matching and by Mahalanobis distance.

* $p < 0.05$, ** $p < 0.01$, *** $p < 0.001$

Table E8

Models with outcome of high school graduation and dropout with propensity score weighting and school-by-cohort fixed effects restricted to students who failed one course in high school.

	(1) Graduate	(2) Graduate	(3) Graduate	(4) Graduate	(5) Dropout	(6) Dropout	(7) Dropout	(8) Dropout
